Technology From another World

WARP Database Business Network Structuring | Hardware and Software ERP System

There are many ways to bring to light a new frontier of newfound technology that can determine product and service solutions.

Our Vision

To be new, different, and leading edge for the benefit of innovative and effective business without the inconvenience of unproven technologies, stale methodologies or outdated business models.

WARP your business.
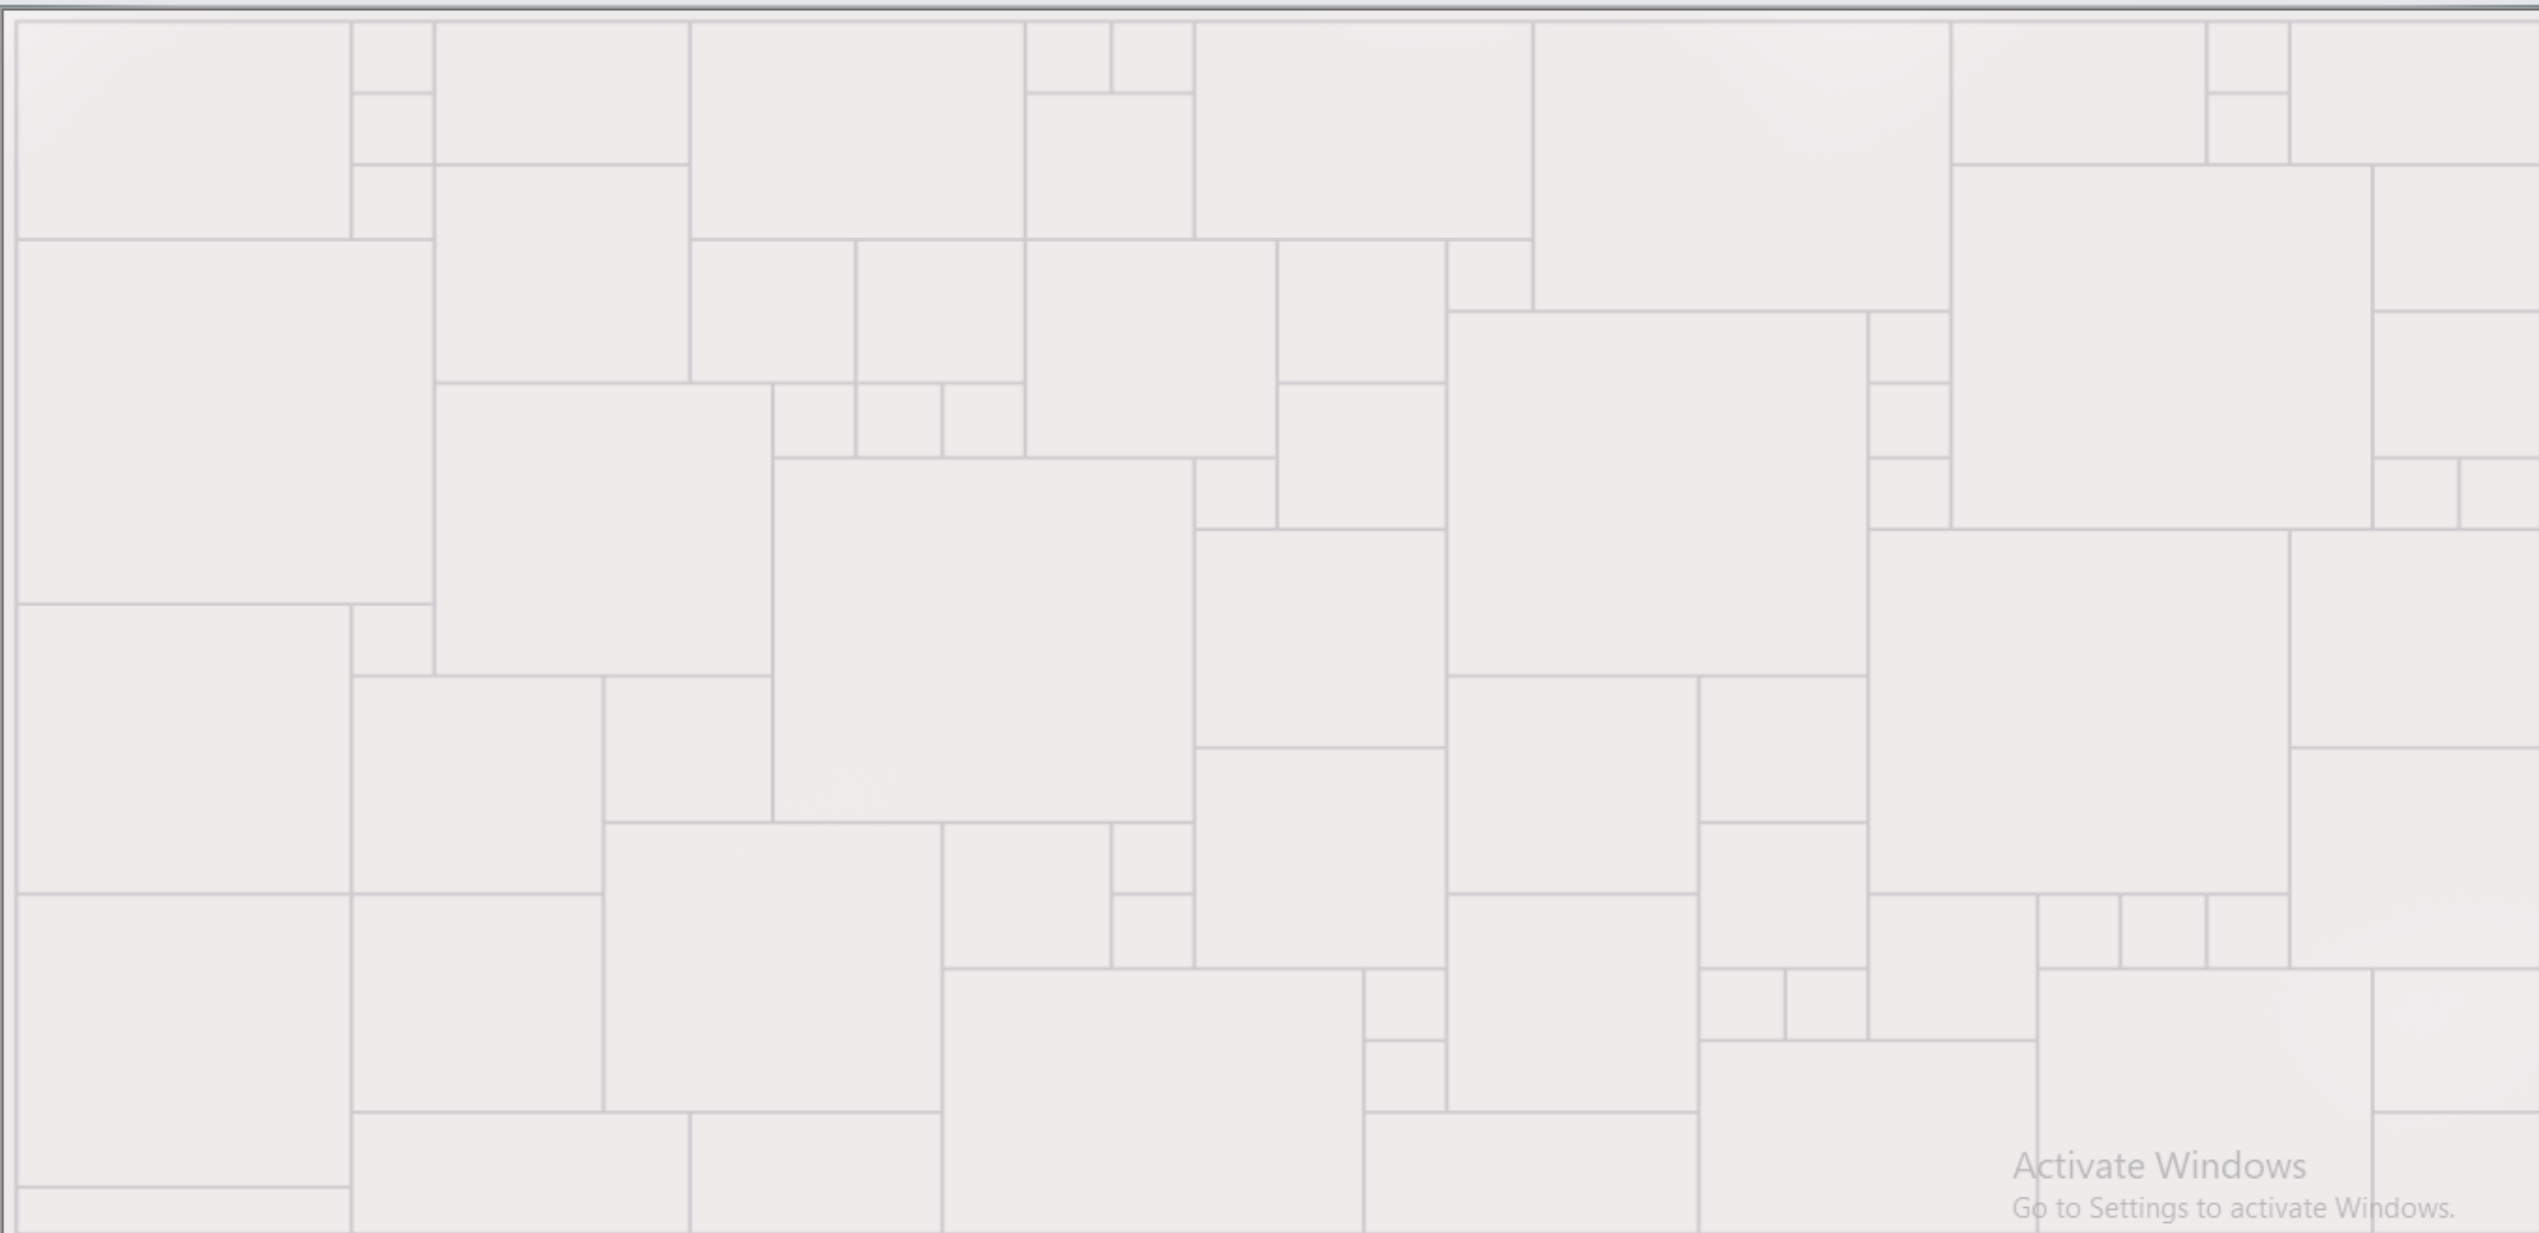

ERP CENTRAL DATABASE

Alien WARP central database

The central database builds on the foundation of your business operations to inherit the fundamentals of basic business ethics. You can transition the data capturing to become the fundamentals as protocols that render the appreciation of effort and align standard operating procedures.

The tailoring brings to light the fundamentals of business operation that encompass the effort of doing traditional bookkeeping, operational data capturing, and business infringement. The greater solution will contribute to the syntax of your money movement, in a point of sale, fuel management, iot, etc.; or, all together; type of business.

The security levels of access set up will become the structure that allows the departments in a business access to the designated modules they use to manage participation. The system operates an API structure that can be included in your business module to manage your line of command, with security access platforms accessible as part of the ERP database can become the solution as part of a network or franchise operation, providing your suppliers access to account documentation, or allow the management to generate reporting, of every data spectrum of each entity and compare the newfound information as enterprise analytics.

WEB PORTALS – COMPANY PORTAL

Alien WARP web portals – Company Portal

HTTP Basic Authentication is a simple authentication scheme built into the HTTP protocol. It is used to enforce access controls to web resources, providing a way for a web browser or other client application to supply a user name and password when making a request, the generated newfound information as a source of reporting.

With the company portal you will be able to get reports on Sales / Sales summary / Grouped sales / Cash-ups / Stock / Orders / Prices / Subaccounts and OLAP which can be saved to excel / PDF or just printed, with granted access to the management of each individual business that forms part of the network or franchise.

Company Portal - The line of reporting can contribute to the access-controlled environment, excelling the experience by being a live online platform.

WEB PORTALS – ACCOUNTS PORTAL

Alien WARP web portals – Accounts Portal

View reports / Statements / Sub-accounts / Orders / Latest Invoices, and OLAP on the Account portal, and online analytical processing on sales. The security login credentials make it easy to allocate remote or desktop set up's to manage the stream of operations. The sub-account allows entities to provide third-party access to set-up orders and manage multiple accounts.

The scale of corporate value contributes to the business ethics we adhere to when we consistently constitute the suffix of the grander approach to validate the corporate leverage as a result of our efforts to provide clients a platform that abbreviates administration on their behalf. This allows the clients or partners the opportunity to manage their accounts wherever, whenever, eliminating the administrative obligations the business has to provide their account statuses periodically.
