WARP Financial Tracking | Hardware and Software ERP

There are many ways to bring to light a new frontier of newfound technology that can determine product and service solutions.

Our Vision

To be new, different, and leading edge for the benefit of innovative
and effective business without the inconvenience of unproven
technologies, stale methodologies or outdated business models.

WARP your business.

ALIEN SIMPLIFIED ARCHITECTURE

PRODUCTS AND SERVICES AS STOCKS VALUED

With Alien WARP valued stock adapted from finished product data, you can entrust the cycle of stock development, movement, and dispatching to the evaluation of the content of your business to perform tasks that require calculated results contributing to the purpose of stock security.

The fact that the renderings can result in the evaluation of the business's worth means the business can contribute to reporting on sales techniques, and determine the forecasting better. The fractions of elementary purchases can include the financial sequence of destruction.

The total evaluation of the stocks contributes to the calculation of totals generated in the reporting of the cycles of money movement. The costing structure of stocks that impulsively meet the demand of the client base will become the newfound technology that brings to light the means to distribute your capital injection accurately.

The cycles of product development and stock movement can be captured including the time and date sequences to structure the allocations of the stages of sourcing to dispatching to perform at maximum, this will result in the factual data primarily contributing to the fundamentals of product assurance and the administrative responsibilities during this cycle of business.

The value added benefits of the cycles of increments of currency values can predict the cycles value in a time frame to convert the financial data into the new found information that circulates when rendering, even the risks and analytics of business to spend investments more accurately.

ACCOUNTS MANAGEMENT

The accounts module provides solutions to set up client accounts, including the terms of those accounts that fraction in the currency value increments of basic bookkeeping structures to securely conduct business when issuing financial obligations on the account.

Bookkeeping and accounting are essential processes in financial management, with bookkeeping focusing on recording transactions and accounting encompassing broader financial analysis and reporting. Alien WARP condenses financial tracking to aid the administrative or reconciliation stages of financial management. The Account portal provides a full business network financial spectrum of generative reports that issue the financial capacity of single sites or the network's entire portfolio in real-time on Debtors Accounts, Creditors Accounts, Suppliers Accounts, Holding Accounts, and Loan Accounts.

Loyalty can be set up on an account to automatically be included when performing elementary transactions, with all variables of costing and retailing included. The loyalty programs of employment lines can issue discounts to staff purchasing goods or paying for services within your business. Sub-accounts can control how every vehicle of the core accounts performs in various locations and report back on the performance. You can generate an age analysis to track and monitor financial data on accounts, including passing journal entries, setting loyalties, sending invoices and statements, to manage the flow of your currency value intake.

The accounts portal platform transcribes the factual data of the operating system into reporting with variables of units in operation, with currency value marginal data to perform accounting tasks with the newfound information.

ELEMENTARY TRANSACTIONING

With Alien WARP Elementary, you can transact using 6 methods of receiving payment into your account, the elements are;

[Cash](#)
[Deposits and Laybuys](#)
[Vouchers and Promotions](#)
[E-payments](#)
[Card Payments](#)
[Credit](#)

These payment elements can be accepted in different locations and in different currencies. The security access and data control will secure the flow of your money entering the business, the communication between the types of elementary transactions allows the business to include the fundamentals of the operations accessibility accurately, and commits to the business's financial portfolio.

Promotions and vouchers as sales techniques are calculated to build budgets and report on successful target market association. These fundamentals of marketing, such as discounts, loyalty vouchers, and promotions, etc.

The chain network driving the till points, as PayPoints, can utilize the desktop transaction mode or the touch screen mode to perform elementary transactions, and the buyer's market online can be configured to manage all customer payment platforms.

The system includes accepting deposits for goods or services, and the business will be able to include the down payment structure in their bookkeeping with generative reporting. The down payment structure, prior to or after receiving goods, will automatically be rendered into the system calculation after being set up.

COOPERATIVE DOCUMENTATION

Financial tracking data documentation contributes to a business's financial portfolio to calculate the business's financial status. The cycles of money movement as reporting include the margins of monetary resources within an organization to help it achieve its financial objectives. The data becomes part of the business's financial management and insurance portfolio, and the documentation serves as evidence.
