"Alien Automation Technologies (Pty) Ltd is a leading provider of integrated hardware and software solutions tailored to the petroleum and retail industries. Built on the principle of "honest profit," we offer future-forward technologies that prioritize reliability, client empowerment, and operational excellence. Our goal is to enable fuel business operators to streamline operations, enhance customer experience, and improve profit margins through innovation."

# ORDER STOCK

Alien WARP Stock Receiving and Transferring – Automated and Manual Stock Ordering

Stock control, also known as inventory control that can be done manually, this keeps all the different products in a business within ideal minimum and maximum levels, with the automated calculations of stock dispatched or retailed, the system will allow the entry and capturing of automated re ordering, as sold goods so the business can fulfil orders without delay, while keeping stock holding costs to a minimum. In short, effective stock control maintains a balance between meeting customer demand and controlling inventory expenditure and risk.

The new technology will determine the financials better, the stock intake can be administered and used to include expansion stock cycles that include higher margins of stock intakes to ensure the flow of business.

These orders are emailed to an automatically monitored mailbox. To set up an auto order, let us have a typical order as an attachment to a typical email with a typical subject line to [support@aliens.co.za](mailto:support@aliens.co.za).

Alien software users are able to simultaneously perform their business activities without needing to close a store for these activities to take place. This has an added cost-saving benefit of not requiring staff to necessarily work after-hours, thus reducing the cost of overtime for this very tedious yet critical business practice.

The system was designed in this manner to facilitate a more efficient business ordering process on an internal and external level.

# STOCK TRANSFER

## Alien WARP Stock Transferring

Optimizing Stock Transfers within the same company between stores is the key to manage effective Networking. This practice optimizes inventory distribution according to demand and each store's specific needs. When one store has excess products and another faces higher demand, stock transfers help rebalance inventory levels across all locations, preventing both stockouts and unnecessary surpluses. Automated software solutioning include the aspects of driven data derivative of stock manual solutions; the fact that the software can create a notion of integrity when it comes to the cycles of stock management, means the technology can include the frontier of fact driven business credentials as the proposed idea to inform the suppliers when contributing to the retail cycle's demand.

Effectively receive & Transfer Stock to and from suppliers, between stores/branches, and even to virtual locations such as wastage, stock corrections, or any other location required by your business. The system allows clients to have control in that they are able to conveniently place their own order, and staff members can also order as part of staff discount schemes. Customize and Organize Multiple Stock Categories to sufficiently contribute to the internal structure of the company. Sales are permitted during the stock take to optimize the sufficiency of stock movement to improve on availability. Integrated Batch Scanning Readers provide accurate countability when controlling the stock intake and dispatching, cordless handheld scanners can be used to enable more efficient stock taking and can be transferred to the Alien system at any time. Automated Variance Clearance can be issued to facilitate final reporting and loss control and stock variances can be cleared directly after a stock-taking activity, allowing you to define the size, scope, and type of clearances, resulting in effective stock management.

# STOCK LOGISTICS

Alien WARP Stock Logistics

This Logistics management sub-module is part of the data base with advanced solutions designed to streamline and optimize shipping, inventory, and supply chain operations for businesses.

Logistics is a term used to describe the planning and execution of the efficient flow and storage of goods, services and related information from point of origin to point of consumption. It encompasses all aspects of managing the supply chain, including procurement, inventory management, warehousing, order fulfillment, transportation, customer service and returns management.

This ERP configured software module provide users with real-time visibility into their entire supply chain, allowing them to identify areas where they can reduce costs and maximize efficiency. With features such as route optimization, order fulfilment tracking and multi-stop shipping, WARP logistics solutions are ideal for companies that need to manage multiple locations or have complex supply chains.

# STOCK REPORTING

## Alien WARP Stock Reporting

On the most detailed side of reporting, Alien offers a Custom Report with around 200 selectable and programmable filters for detailed reporting that can be grouped by various fields.

Analyse allows to report on opening and closing stock, sales rates, sales by categories and type, suppliers, and more.

Express Reports give quick answers to questions often asked around stock management.

Clock In allows for staff work hour management.

Fuel Reports has all the reports to manage a forecourt. The Shift End Report displays all elements to reconcile a shift. From tank sales, to electronic total variations to payment type break downs to staff sales. This makes it easy to reconcile a shift quickly.

All reports and grids throughout Alien can be instantly emailed, printed, exported or directly opened in Excel.

### Online functionality

#### For Alien Clients

Alien clients are provided with an online portal offering basic reporting and functions, which can also be accessed according to security levels. Functions, which are particular to a client in the Alien system, are published [here](#).

#### For Clients' Customers

Clients' customer get a dashboard to view their real-time statements and invoices or transactions per sub-account (vehicle) are available.
